Two programs designed to improve patient follow-up and compliance rates

Maintain continuity of care by referring your patients to our **Express Access Network** and **Telemental Health** providers upon discharge

These programs are designed to make it easy, convenient and timely for Members to get an appointment and receive the services they need. Providers participating in these programs can be found in our online directory, **Live and Work Well**.

**Express Access Network** is subnetwork of Optum-credentialed providers who have agreed to offer Members a routine appointment within 5 business days of the request.

Our **Telemental Health** network expands providers’ geographic reach, as well as giving Members more choices for care. Our Telemental Health network not only addresses the grave shortage of behavioral health providers (especially prescribers) nationwide, but Members are generally able to get an appointment within one week.

Live and Work Well

The **Live and Work Well** website allows visitors to quickly search for behavioral health providers by specialty, zip code, city and state.

More than just an online directory, **Live and Work Well** is a powerful health resource that is here to help Members and those you care for find the balance, support and care needed to live their lives to the fullest.

The next page demonstrates how easy it is to search for our Express Access and Telemental Health providers on **Live and Work Well**.
Express Access Network providers have contractually agreed to see members within five business days of request.

Peer-reviewed research shows decreased wait times help improve outcomes and lower re-admit rates.

Optum now has 85% coverage nationwide of having at least one Express Access provider within a 20-mile range of Members.

Express Access providers can be filtered on Live and Work Well and are designated with the Stopwatch icon for easy identification.

Our Telemental Health network directly addresses the national shortage of behavioral health care providers, especially prescribers.

Optum TMH drastically improves access by expanding geographic region and broadening provider choice for Members.

TMH Member appointments occur within one week.

Telemental Health is not an add-on benefit; rather it is considered an alternative mode of service billed at standard fee schedule rates.

Finding Telemental Health providers is even easier — they have their own tab right on the main search page.

Start your search by clicking on the FIND A PROVIDER tab and entering either a zip code or city and state.

Click the Express Access Filter along the left of the screen.

Look for providers with the Express Access stopwatch icon displayed.
