Behavioral Health Identification, Treatment and Referral in Primary Care: 3-Part On-demand Series

Integration of behavioral health services into the clinical primary care setting is often an overlooked component of population health management. The integration of these two specialties is an important care model needed to successfully manage population health and improve outcomes. This series will discuss best practices for the integration of behavioral care into a primary care setting.

Earn up to 1.50 CME/NCPD/APA/ASWB credits per activity.
